Contents

- ▶ NZX Group Description
- ▶ IH 2012 Summary
- ▶ Outlook
- ▶ Appendices
 - Business Review
 - Capital Structure and Investments

- ▶ NZX is an integrated Information, Markets, and Infrastructure business. These three business areas are operated on an increasingly integrated fixed cost base:
 - Information - Provides high quality securities market and soft commodity market information
 - Markets - Operates cash equities, bonds, derivatives, and spot commodities markets
 - Infrastructure - Operates clearing and settlement platforms in securities and energy, and designs, builds, and operates other contracted technology platforms

IH 2012 Overview

- ▶ IH revenues \$26.5M, up 1% over pcp
 - Markets and related businesses impacted by a challenging global environment
 - NZX lagging the decline in trading volumes globally
 - Capital raising significantly lower than last year
 - Agri-business performed well despite an increasingly subdued rural economy
 - Strong performance in commodity trading as market acceptance of NZX's product offering grows
- ▶ IH expenses \$16.9M, up 17% over pcp
 - Includes one-time CEO transition costs, the Ralec litigation, and a number of non-recurring items totalling \$2.0M
 - Reflects reduction in capitalisation of \$1.1M as investment shifts from infrastructure development to market development and operation
- ▶ EBITDAF \$9.6M down 18% on IH11 is in line with the trading update provided to the market on 29 July
- ▶ Quarterly dividend of 1.25 cents per share fully imputed declared, to be paid on 14 September

One-off items and reclassifications

- ▶ EBIT impact of \$2.3M in one-off costs
 - CEO transition, Ralec litigation, other items (\$1.3M)
 - Revenue and expense accruals (\$1.0M)
- ▶ Change in useful life to reflect latest estimates and alignment of certain software with the trading system contract with a resulting increase of \$0.4M of amortization
- ▶ Reclassification
 - Rebates are now netted off against relevant revenues
 - Energy and Technology and Customer Services combined into Market Operations which includes the Electricity Authority contracts and the contract with Fonterra to operate the FSM

Other Items

Dividend

- ▶ Dividend of 1.25 cents per share declared in line with current policy
 - Stated policy of increase of 1 cent per share (from 11 cps paid in 2011 to 12 cps paid in 2012)
 - Post share split 12 cps equates to 5.14 cents per share
 - Combined Q1 and Q2 dividend equates to 2.64 cps

- ▶ The NZX Board will consider each subsequent quarterly dividend against free cash flow expectations and, if appropriate, may resolve to increase one or more successive quarterly payments

CEO Share Scheme

- ▶ A CEO share scheme has been agreed under the new CEO's employment contract. The scheme runs for a period of 5 years expiring mid 2017
- ▶ 1,575,000 new ordinary shares will be issued pursuant to the scheme at an issue price of \$1.19 per share, being the volume weighted average price of NZX shares for the 10 business days ended on Friday 4 May (the business day immediately preceding the CEO's start date)
- ▶ The shares will be funded by a loan from NZX which will bear interest at NZX's cost of bank funding. The shares will rank for dividends and will be held by a nominee wholly owned by NZX for the duration of the scheme
- ▶ If over the period of the scheme NZX's TSR exceeds a margin of 1% over NZX's weighted average cost of capital (to be determined annually by the Board), the CEO will receive a taxable bonus equivalent to the amount of the loan and a transfer of the shares. If the hurdle rate is not met, then on expiry of the scheme the CEO will be required to repay the loan from his own resources and receive a transfer of the shares
- ▶ The CEO will not be permitted to dispose of the share scheme shares without Board approval until 10 business days after publication of NZX's results 6 months after the end date of the scheme

2H 2012 Outlook

2H Outlook

- ▶ Global uncertainties are likely to persist for the remainder of 2012 with the resulting continued impact on the capital markets globally
 - Trading volumes expected to remain flat or potentially decline further
 - Capital raising below historic averages
- ▶ Flat growth expected in NZX's securities information business with the agri-information businesses expected to grow at slower rate in the second half of the year
 - Reduction in demand for securities data
 - Rural outlook impacted by commodity price declines
- ▶ With the exception of commodities, the markets businesses are expected to show flat to low growth with some upside in listings with the potential IPOs of Mighty River Power and the Fonterra FSF. Commodities are on track for continued strong growth
- ▶ The Market Operations businesses are expected to grow strongly with the proposed implementation of the Financial Transmission Rights in the electricity market and the expected launch of the Fonterra Shareholders Market
- ▶ Selected investments are planned in three areas for the remainder 2012
 - Strengthening the organisation with the appointment of a CFO and Head of Cash Markets
 - Growth of the agri, derivatives and issuer services businesses
 - Staff to support the growth in Market Operations

Movement in staff costs

Employee, Contractor & Related Costs
(\$ 000's)

Commentary

- ▲ Selected investment in three areas
 - ▲ Strengthening the senior team and enhancing operational capabilities
 - ▲ New initiatives (derivatives, agri and issuers)
 - ▲ Additional recruiting for TAF and Energy contracts
- ▲ Reducing capitalisation reflecting a shift in focus from infrastructure investment to market development

Outlook for 2013

- ▶ Despite the challenging global environment, NZX remains confident in the opportunities ahead
 - Universal support for taking a new approach to capital raising for small and mid-sized business
 - Opportunities to build on our existing offering to broaden the range of products and services offered within the capital markets e.g. issuer services, agri-information, equity derivatives
 - Continued strong growth in commodity businesses

- ▶ The investment made in the clearing house and trading system over the past few years provides the infrastructure to support these developments
 - Ability for the organisation to redeploy resources from infrastructure development to market development and operation
 - Modest level of additional investment in development and operation required
